**project**  
FELT MUSTACHE CARD

---

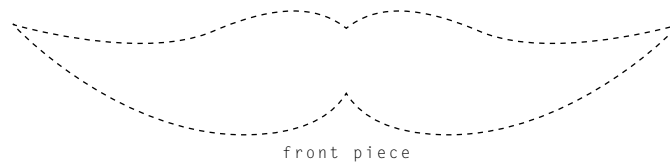

**supplies**

- felt
- toothpicks
- hot glue gun
- blank card
- scissors
- x-acto knife

**directions**

1. Use the pattern below and cut felt in a color of your choice.
2. Place a dab of hot glue in the middle of the mustache. Place a toothpick and the back piece over the toothpick before the glue cools completely. Note: this step needs to be done quickly as the glue cools fast.
3. With your x-acto knife cut two slits on the front or inside of the card (whatever you prefer) just big enough to slide the toothpick through.
